Description:

Appraisal System software for maintaining performance of an employee. During the appraisal period, before the written review or rating. The review or rating based KRA and Competency. In relation to a job role, KRA (Key Result Area) defines the outcome or end result expected to be delivered while KPA (Key Performance Area) defines all the activities, not always result oriented, an individual has to perform being on job

If the content of an employee appraisal is less than satisfactory, clearly communicate how you will help your staff member improve to the level of your expectations and the amount of time that it should take.

Write a plan for improvement that your employee can follow and discuss it together. Offer training courses, mentoring, life and work balance solutions or any other aid available.

Environment:

HTML, CSS, JavaScript, jQuery, MVC 4.5 Entity Framework, LINQ AJAX, JSON, MS SQL Server 2014, Visual Studio 2013.

Responsibilities:

- Applied Prototype design pattern in the project.
- Executed programming functions utilizing HTML, CSS and Microsoft .NET technologies.
- Responsibility for Internal process management of the project.
- Designing the screen according to requirement.

Key Achievements:

- Uses sound coaching techniques to solve disciplinary problems.
- I understood the Appraisal Domain knowledge.

Description:

EIP acts as the foundation of the entire HR system. It hosts all employee data as well as update information from other modules of EHRIS. Since it is integrated, details such as trainings attended and succession related information can be stored for employees. The EIP module contains the following features:

- ✓ Provides easy access to employee's individual data, and profile information with their photo.
- ✓ Provides a list of company assets issued to employees such as laptops, and PDAs. Asset information is stored with their serial numbers, make, model, etc. for easy tracking.
- ✓ Supervisors, team leaders, or managers can view their team details to evaluate or contact the employee.

Environment :

HTML, Bootstrap, CSS, JavaScript, jQuery, .Net/MVC 4.5 framework, Ajax, Json, SQL Server 2014, Visual Studio 2013.

Responsibilities :

- Create corporative application for business purpose.
- Build Database throw database first in MVC.
- Used Java-Script and jQuery extensively for performing client-side validations.
- Analysis of many customizations done.
- Designing the screen according to requirement.

Key Achievements:

- I achieved Application maintenance project life cycle.
- I understood the Employee portal information structure of the project.
